## SUMMARY

Software engineer with deep Laravel experience, shipping production web apps and APIs end to end. Also working with Node.js on newer products. High-concurrency systems at national scale.

## EXPERIENCE

**Software Engineer, Zhikan** 2025 - present  
National campus-card, payment, and inquiry platform for Islamic Azad University (high concurrency, load-balanced APIs). BNPL / installment credit. Organizational budget and credit allocation. Zaanin payment links.

**Software Engineer, Plannet** Dec 2025 - present  
ReezAmooz multi-org learning platform. Ditamin (ditamin.ir): vitamin D PWA with Node.js API, live in production.

**Software Engineer, Spad Server** Apr 2024 - Jan 2025  
Marketplaces and ops tools: APIs, admin, caching, client integration.

**Software Engineer, Geev Server** Apr 2023 - Apr 2024  
Intern to engineer. APIs and data access, shipped with the product team.

## SELECTED WORK

**National campus card, payment & inquiry (confidential)**  
High-concurrency card issuance, fee payment, document review, and inquiry APIs for Islamic Azad University.

**BNPL & installment credit (confidential)**  
Buy-now-pay-later: credit, checkout, and repayment flows. Production, not a demo.

**Organizational budget & credit allocation (confidential)**  
Capital and operating credit pipelines: plans, allocations, receipts, year-scoped reporting.

**Ditamin - ditamin.ir**  
Persian RTL PWA. Offline UI, OTP. Node.js API (newer stack). Live.

**ReezAmooz - reezamooz.ir**  
Multi-org learning panel: staged courses, quizzes, users, rewards.

**Zaanin - zaanin.ir**  
Merchant SMS payment links, settlements, gateway setup.
