SUMMARY

Laravel full-stack engineer: PHP APIs, React clients, MySQL/Redis, and Docker in production. Payment, credit, and ops products end to end. High-concurrency systems at national scale. Node.js on newer products.

EXPERIENCE

ZHIKAN

Software Engineer

2025 – present

Laravel APIs for a national campus-card, payment, and inquiry platform at high concurrency, load-balanced production.

BNPL / installment credit: credit, checkout, and repayment in Laravel + React.

Organizational budget and credit allocation: plans, receipts, reporting, year-scoped auth.

Zaanin: Laravel + React payment links, settlements, JWT, Redis.

PLANNET

Software Engineer

Dec 2025 – present

ReezAmooz multi-org learning platform: Laravel API, React/TypeScript panel, S3.

Ditamin (ditamin.ir) — live PWA; Node.js API on this product (newer stack).

SPAD SERVER

Software Engineer

Apr 2024 – Jan 2025

Marketplace and ops tools: Laravel APIs, admin, caching, client integration.

GEEV SERVER

Software Engineer

Apr 2023 – Apr 2024

Intern to engineer. APIs and data access, shipped with the product team.
