SUMMARY

Full-stack software engineer shipping production web apps and APIs end to end. Deep Laravel experience on high-concurrency systems at national scale; also shipping live products with Node.js and React. Comfortable with WordPress builds and workflow automation when the role needs them.

EXPERIENCE

PLANNET

Software Engineer

Dec 2025 – Aug 2026

Ditamin (ditamin.ir): Node.js + Fastify API, PostgreSQL, OTP; React PWA with offline UI, live in production.

ReezAmooz: TypeScript/React learning panel; Laravel API on this product.

ZHIKAN

Software Engineer

2025 – Oct 2026

React clients for payment, credit, and merchant products.

High-concurrency production APIs (Laravel) for campus-card, BNPL, and budget systems — same full-stack delivery model.

Zaanin: React + JWT payment-link UI.

SPAD SERVER

Software Engineer

Apr 2024 – Jan 2025

Marketplace and ops tools: APIs, admin, caching, client integration. Mentored a few junior engineers and interns on features and code reviews while growing as an engineer.

GEEV SERVER

Software Engineer

Apr 2023 – Apr 2024

Intern to engineer. APIs and data access, shipped with the product team.

SELECTED WORK

Ditamin

ditamin.ir

Live Persian RTL PWA. Offline UI, OTP. Node.js API (Fastify), PostgreSQL, React. Production, not a demo.

ReezAmooz

reezamooz.ir

Multi-org learning panel in TypeScript/React: courses, quizzes, users, rewards. Laravel API.

Zaanin

zaanin.ir

Merchant payment-link UI in React. JWT, Redis; Laravel API.

National campus card, payment & inquiry

Confidential

High-concurrency card issuance, fee payment, inquiry APIs. React clients. Load-balanced production. (Laravel APIs.)

BNPL & installment credit

Confidential

Checkout and repayment UI in React. Production fintech. Laravel API.

Organizational budget & credit allocation

Confidential

Credit pipelines, reporting, year-scoped auth. REST, RBAC. Laravel API.

SKILLS

Frontend: React, Next.js, TypeScript, PWA, Vite, Tailwind, Zustand

Backend: Laravel, PHP, Node.js, Fastify, Queues/Jobs, Testing (PHPUnit)

Data & infra: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Docker, S3

CMS & automation: WordPress, workflow automation, scripts, CI/CD
